Professional Summary

Software Engineer at Polygon Technology with over 2.5 years of experience in frontend development, specializing in React.js and Next.js. Strong foundation in data structures and algorithms, with a track record of solving 2000+ problems across competitive programming platforms. Passionate about building scalable, user-focused applications and delivering clean, maintainable code. Thrive in collaborative environments and enjoy turning complex challenges into practical, high-impact solutions.

Technical Skills

Programming Languages: C, C++, Java, JavaScript, TypeScript

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP)

Web Development: HTML, CSS, Bootstrap, Tailwind CSS, React.js, Next.js

State Management: Redux

Version Control: Git, GitHub

Database: MySQL

Containerization Tools: Docker

Professional Experience

Polygon Technology

Dhaka, Bangladesh

Software Engineer

Jan 2024 - Present

- Built a SaaS-based phishing simulation platform with an integrated security awareness LMS. Currently running in production across 3+ banks in Bangladesh, including Dhaka Bank, Community Bank, and NCC Bank.
- Built the entire frontend of the official Bangladesh National Parliament website, delivering a fully responsive, fast experience across devices — currently live in production as a key government digital platform.
- Built a Visitor Management System (VMS) – a SaaS-based solution enabling organizations to manage and track visitor access efficiently.
- Worked on Shukhee, an e-health platform by Grameen Digital Healthcare Solutions, enhancing the frontend to deliver a smoother and more responsive user experience.
- Developed an Energy Monitoring System, an IoT-based solution for real-time tracking and visualization of energy consumption, aiding in smarter energy management.

Education

University of Information Technology and Sciences

Dhaka, Bangladesh

Bachelor of Science in Information Technology

Jan 2020 - Jan 2024

- Relevant Coursework: Object-Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Advanced Data Structures and Algorithms.

Competitive Programming Experience And Achievements

- **Pupil** on Codeforces - Highest Rating: **1318**
codeforces.com/profile/Moynol_Ome
- **3★ Coder** on CodeChef - Highest Rating: **1657**
codechef.com/users/ome_1256
- Top **30.57%** on LeetCode - Highest Rating: **1555**
https://leetcode.com/u/moynol_hasan_ome/
- **4th Place** – Solo Intra-University Victory Day Programming Contest, 2022
- **5th Place** – UITS Inter-University Collaboration Programming Contest 2022
(with BUBT & IUBAT)
- **7th Place** – Intra-University Programming Contest, 2022

Projects

Cyberwise

Polygon Technology

- Contributed to a Phishing Simulation Platform (SaaS) aimed at boosting employee cybersecurity awareness through simulated phishing campaigns and response tracking.
- Built and integrated a Learning Management System (LMS) to deliver cybersecurity training modules, quizzes, and post-simulation progress tracking.
- Developed customizable phishing templates, automated campaign scheduling, and detailed analytics dashboards for both the phishing simulator and LMS.

Bangladesh National Parliament – Official Website

Polygon Technology

- Built the entire frontend of the official Bangladesh National Parliament website independently, from architecture to implementation.
- Currently live in production, serving as a key official government digital platform.

Visitor Management System

Polygon Technology

- Created a cloud-based Visitor Management System to replace manual sign-in processes with a digital, secure workflow.
- Reduced administrative overhead by automating visitor approvals, notifications, and access logging.
- Improved workplace security and transparency with live dashboards and audit trail features.

Shukhee

Polygon Technology

- Contributed to Shukhee, an e-health platform by Grameen Digital Healthcare Solutions, focusing on improving frontend performance and usability.
- Improved UI responsiveness and accessibility, ensuring a smoother user experience across devices for patients and healthcare providers.
- Collaborated closely with designers and backend teams to implement user-centric features and optimize the platform's overall interaction flow.

Energy Monitoring System

Polygon Technology

- Developed and deployed an IoT-based Energy Monitoring System to continuously collect real-time power usage data across multiple endpoints.
- Designed intuitive dashboards and customizable visualizations that display consumption trends, peak loads, and cost projections to empower data-driven decision-making.
